

Your task is to produce an A4 poster about a famous scientist.

Include the following points

Who were they?

When were they born?

Where were they educated?

What did they discover?

When did they die? (Unless they are still alive)

WHO you choose to study is up to you.

Use the internet, books etc. to aid your research.

Try starting by putting “famous scientists” into the search bar?

It would be nice to be able to use these A4 posters to produce a display so...

1. Make them eye catching.
2. Include further detail to inform the reader.
3. Include pictures to break up the text.

When finished, this can be printed or emailed to your science teacher.
