7	How are rivers important to people?
8	How do rivers create problems?
9	How can flooding be managed?
10	Review.

Homework Challenges			
Task 1:	KNOWLEDGE	Learn keywords and definitions for a test. (could include gap fill?)	
Task 2:	SKILLS	Create a 3D model of a river valley with labels.	Complete graph and calculations.
Task 3:	COMMS	Annotate to explain the processes and landforms created.	Describe/explain data. Use own words and keywords.
Revision	Complete Seneca Learning assignment		
Test	Read questions carefully. Look for command and key words as well as number of marks available/amount of space.
