

Maths - Week Starting 18th May – 8.3A and 8.3B

This is the last week before half term and if you are up to date you will have completed the work on ratio and proportion. So I want you to do some general practice on number skills this week.

Lesson 1

Google 'Corbett Maths' and go to the website.

Click on 'Worksheets'

Scroll down until you find 'Multiplication: Times tables'

Click on 'Textbook Exercise'

Do all of the first page in your books, no calculator, no help from times tables.

Mark it and make a note of which times tables you are not 100% sure of. Click on the white arrow at top of page and find the times table videos. Watch the video of the tables you are unsure of and make a real effort to remember, copy out in your book, then cover and write out yourself.

The second page contains 6 number problems which involve multiplying. Do these in your books and then mark your answers.

How to find the answers:

At the bottom of page 2 click on the green tick.

Then click on 'Click here for answers'

Lesson 2

Go on to Corbett Maths and Worksheets again.

Scroll down to 'Decimals: ordering'.

Watch the video first.

Click on 'Textbook Exercise' and do all of the worksheets in your books.

Mark your work.

Lesson 3

Go on to Corbett Maths and Worksheets again.

Scroll down to 'Graphs: bar charts (reading)'.

Watch the video first.

Click on 'Textbook Exercise' and do all of the worksheets in your books.

Mark your work.

If time permits you may wish to try some of the [WW2 Code Breaker Challenges for Fun](#).
