

Week starting 06/07: Maths 9(1a) and 9(1b)

Dear year 9,

I want to start by saying a massive congratulations and well done to those of you that have worked so hard this summer term! It has been a new experience to all of us. This time has taught you to be self-disciplined and motivated to take responsibility in your own learning. You should be so proud of yourself. This time has taught you valuable life skills! To be able to work from home is a skill that will serve you incredibly well throughout your life, well done again for ceasing this opportunity of a new experience of learning.

You now have 2 weeks until the summer holidays to complete both reflection forms and get totally up to date on all of the online assignments. Use the RAG rating column in the forms to grade your own abilities:

Red- needs some more work

Amber – feeling OK, but it could be better

Green – feeling great about this topic

You can then keep referring back to the reflection forms over the summer holidays. For topics that are on red or amber you need to keep re-watching the links, research other websites to help you understand as best you can, with the intention of making every topic on the list a green.

You have also been set an 'End of year 9 Assessment' on Mathswatch. It's 1.5 hours worth of questions on everything we have covered this term. You can keep dipping in and out of the online assignments to try and improve your score (you don't have to complete it all at once like a test).

To summarise: you will have 2 reflection forms and 1 Mathswatch assignment to complete this fortnight.

Let's use these next 2 weeks to study the topics, email me questions and perfect your scores so we can enjoy a well deserved summer holiday!

Best wishes and stay safe,

Miss Brice
